

Monte de Vita is a juice freshly squeezed from fruit taking its origin from the biggest centre of orchard industry in Poland (in Grójec).

In this particular region the horticulture was initiated by the Benedictines, but the very first reference regarding orchards date back to 16th century. The 500-year-long tradition of orchard cultivation that was passed through generations as well as the use of the newest technological solutions allowed us to produce fruits of superior quality. It is from this particular fruit that Monte De Vita juice is produced.

Monte De Vita juice contains vitamins and microelements which are found in the fresh fruits and constitutes a natural source of fibre. It is produced by the European orchardists associated in the group of the fruit producers that long for making it possible for people from all over the world to consume real fruit juice. The juices that are freshly squeezed and NOT from concentrate. Monte De Vita NFC juice is produced without any addition of water, sugar substitutes, preservatives, thickeners not artificial fragrances and dyes. The technology of its production ensures preservation of vitamins, nutritional substances and extends its expiry date whilst keeping it 100% natural.
