

VICI+Oil functional oils are a blend of unrefined, cold pressed oils that have ratio 2:1 of **omega 3** to omega 6. **Omega 3 fatty acids** belong to essential unsaturated fatty acids (EFAs) that the human body is unable to produce by itself. **Omega 3** acids supplied from the outside, contained in the functional oils, significantly affect the work of the whole body, in particular the **work of the cardiovascular system and the nervous system**. The use of **VICI+Oil functional oils** obtained from seeds of plants grown in a traditional way, also contributes to the protection of the ecosystem, in particular to the reduction of the demand for Omega 3 acid from fish and organisms living in the aquatic environment.

ACTIVE MEN

Ingredients: flaxseed oil 91%, pumpkin seed oil 5%, hempseed oil 4%.

Flaxseed oil is rich in healthy omega-3 fatty acids, playing an important role in all body processes, supports the proper functioning of the heart and brain. The oil is used as a support in the prevention of hypertension, constipation, gastrointestinal problems and hair. Used regularly, it also improves skin function and accelerates wound healing.

Pumpkin seed oil is known for its anti-parasitic prophylaxis properties, and also provides support in the treatment of prostate, male pattern baldness and urinary tract diseases.

Hempseed oil is valuable due to the unique, high, over 80% content of essential unsaturated fatty acids (EFA). This oil is known as an excellent carrier of repair and rejuvenating substances (plant extracts) and a source of vitamin K. It supports the functioning of the circulatory system and reduces blood pressure. Has a beneficial effect on lowering cholesterol.

ACTIVE WOMEN

Ingredients: flaxseed oil 92%, evening primrose oil 4%, hempseed oil 4%.

Flaxseed oil is rich in healthy omega-3 fatty acids, playing an important role in all body processes, supports the proper functioning of the heart and brain. The oil is used as a support in the prevention of hypertension, constipation, gastrointestinal problems and hair. Used regularly, it also improves skin function and accelerates wound healing. Consuming linseed oil is beneficial for women with polycystic ovary syndrome.

Evening primrose oil it is ideal for women struggling with dermatological problems such as acne, dry and irritated skin, as well as every day for cosmetic purposes. It alleviates metabolic, kidney and liver problems. Beneficial for all women who are struggling with pre-menstrual syndrome (PMS). Used by women, it has a positive effect on pain syndromes, mood swings and improvement of well-being during menopause.

Hempseed oil is valuable due to the unique, high over 80% content of EFA. This oil is known as an excellent carrier of repair and rejuvenating substances (plant extracts) and a treasury of vitamin K. The beauty properties of hemp oil are due to linoleic and alpha-linolenic acid, which are necessary for maintaining a beautiful, young and healthy complexion.

ACTIVE JUNIOR

Ingredients: flaxseed oil 85%, rapeseed oil 10%, evening primrose oil 5%.

Flaxseed oil is extremely important for the development of the youngest, who have an increased demand for Omega 3 acids. Omega 3 acids are the basic building blocks of cells and tissues of the body, and are necessary for the brain to work properly and regulate hormones. Fats in the child's body are necessary for proper growth and are an irreplaceable source of energy for them. Natural, unmodified VICI + Oil oils do not increase body weight.

Rapeseed oil is a valuable source of fat-soluble vitamins, especially provitamin A, as well as vitamins K and E.

Evening primrose oil its regular intake helps cleanse the body of toxins, which in turn gives children the strength to fight infections. In addition, omega-6 fatty acids contained in evening primrose stimulate the immune system and also support protection against respiratory infections, allergies and asthma.

ACTIVE SENIOR

Ingredients: flaxseed oil 92%, evening primrose oil 5%, black caraway oil 3%.

Flaxseed oil has many beneficial properties, making it a great alternative for older people. This oil supports the circulatory system, increases immunity and has a positive effect on maintaining normal blood cholesterol levels. The presence in the diet of unsaturated essential fatty acids supplied from linseed oil, contributes to the reduction of the so-called "bad" LDL cholesterol, while increasing the amount of so-called "Good" HDL cholesterol. In addition, linseed oil provides a healthy dose of energy, improves mood, memory and concentration.

Evening primrose oil its regular intake strengthens immunity and generally improves the condition of the body. It alleviates metabolism problems as well as kidney and liver function.

Black caraway oil supports the elimination of the harmful effects of free radicals, thus reducing the risk of developing many serious diseases. It has a positive effect on reducing the risk of heart attack, stroke and atherosclerosis. Stimulates metabolism and supports digestion. Has antibacterial and antifungal properties.

A beneficial effect is obtained with a **daily consumption of 5 ml**

VICI+Oil oils are perfect as an addition to dishes prepared cold (only in this case can retain all the most valuable properties).

Vegetable oils are very sensitive to light, which destroys their properties and the most valuable values. VICI+Oil oils are stored in **dark, glass bottles**, thanks to that we can enjoy their properties for longer.

Legend:

Vitamin **A** - a source of youth, beneficial effect on eyesight and skin

Vitamin **E** - protects the body against cell damage caused by free radicals

Vitamin **K** - strong blood vessels, antibacterial and anti-inflammatory properties
